

International Additive
Manufacturing Group sp. z o.o.

REGON: 146701436
NIP: 5213649922

ul. Domaniewska 3, 05-800 Pruszków, Polska

Who are we?

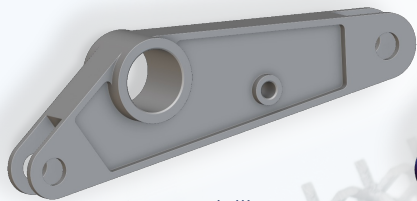

IAMG International Additive Manufacturing Group:

3D printing service provider with 7 years of experience producing metal and plastic parts.

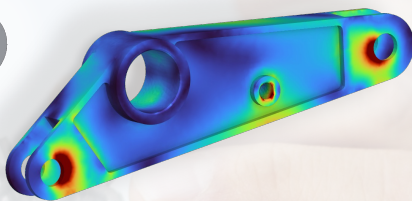

1st 3D printers Manufacturer with PBF (Powder Bed Fusion) Technology in Poland.

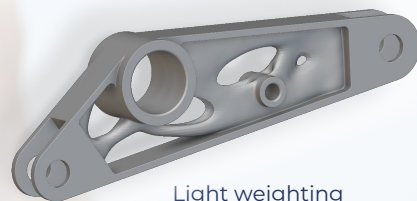

Engineering Beaurue for additive manufacturing

CAD Modelling
3D scanning

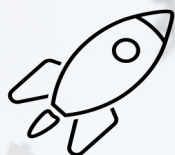

Stress analysis

Light weighting
Typology optimization

Specialized in manufacturing parts for the following industries:

Aerospace & Defence

Automotive

Robotics

Industrial

Energy

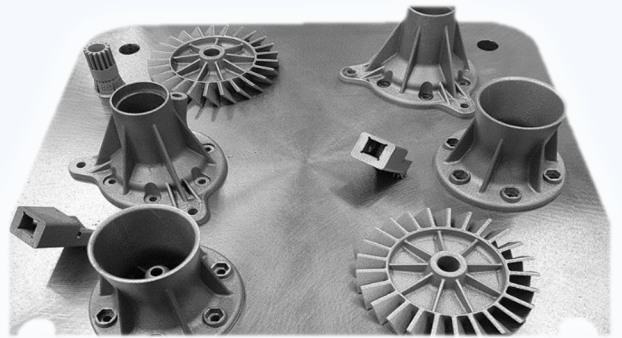

Medical

Why to manufacture parts with IAMG?

Produce complex geometry

Produce parts of various shapes in any quantity. With wide range of materials to have superior mechanical properties, high temperature resistance and anti corrosion parts.

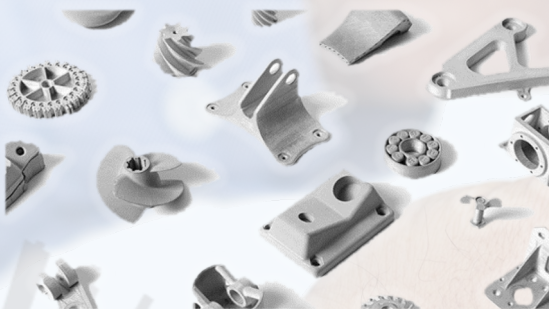

Geometry optimization

Improve the design of your products, reduce their weight while maintaining functionality. Applying additional material on weak points to increase lifetime of the part.

Structural simplification

Print complex structures as a single part. This improves product quality by minimizing errors or defects. Removing welding to increase part's lifetime.

Manufacture obsolete parts

Produce personalized and multifunctional parts that are not available to purchase. Out of stock parts could be reversed engineered, optimized and printed.

3D Printing ROI with IAMG

IAMG helps you to decrease costs of both serial production parts and prototypes efficiently. Produce fast with lead time starting from 1 day.

Cost savings
70-90%

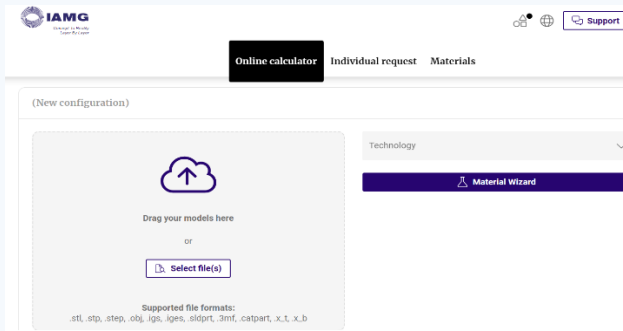

Lead Time
40-90%

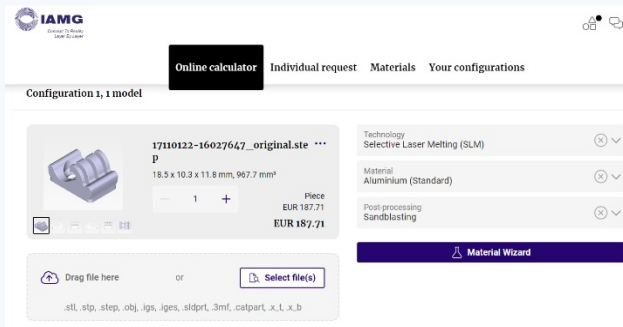

How to manufacture your components with us?

You have the 3D model !

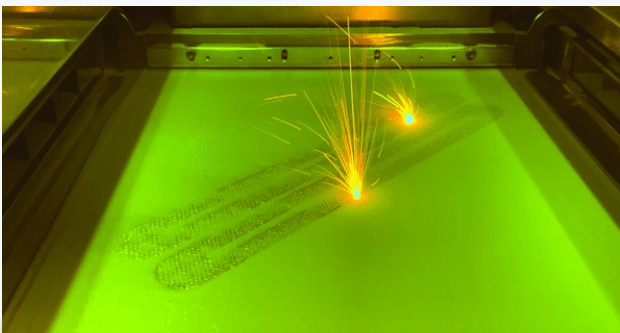

1. Upload your model and select the technology and material.

2. Get quotation

3. Manufacturing stage

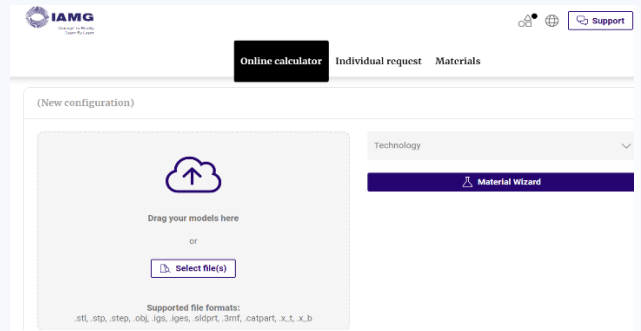

4. Receive the part

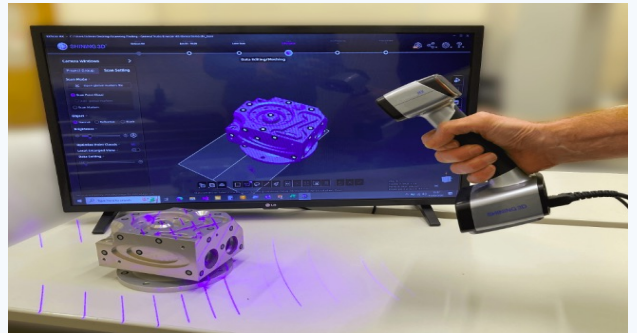

You don't? No problem

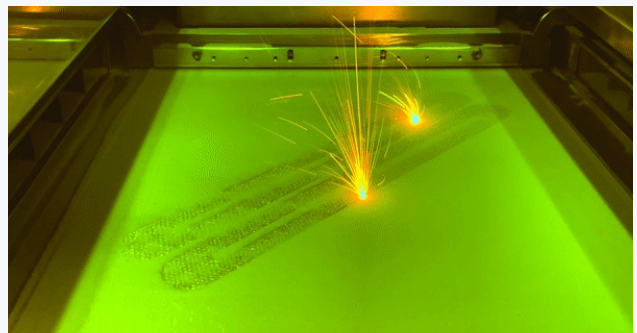

1. Send individual request

2. Reverse engineering & quotation

3. Manufacturing stage

4. Receive the part

IAMIG

Concept to Reality Layer by Layer

Start Smart Manufacturing with us !
